Venue

Scuola Grande di San Giovanni Evangelista,
Venice, Italy www.sgiovanniev.it

Deadline abstract submission

August 15, 2004

Costs including lunch, coffee breaks and
Sunday evening reception

	Until June 2004	From July 2004
Regular	100 Euro	150 Euro
Residents	75 Euro	125 Euro

First announcement

HUMAN PAPILLOMAVIRUS AND SKIN CANCER

International symposium on cutaneous HPV infection and development of skin cancer

Sunday, October 10, 2004

Venice, Italy

Web site: to be announced

Invitation

It is our pleasure to invite you to the "Human Papillomaviruses and Skin Cancer" symposium. This international symposium, planned immediately prior to the EDEN-IDEA Dermatology meeting in Venice, will bring together dermatologists, virologists, epidemiologists and other persons interested in cutaneous HPV infection and skin cancer.

For some time it has been known that a large proportion of non-melanoma skin cancers contain HPV-DNA. The evidence that HPV is somehow involved in skin carcinogenesis is increasing as shown by recent epidemiological and fundamental studies. In this symposium we would like to discuss some of the latest developments in: epidemiology of cutaneous HPV infection and non-melanoma skin cancer, HPV host cell and UV interactions, cutaneous HPV detection methods and future therapeutic options. Hopefully, these discussions will initiate new research areas to further unravel the role of HPV in the development of skin cancer

The symposium will consist of guest lectures of experts in the field and selected abstracts to discuss the latest developments in this exciting new research area.

Scientific topics

- Epidemiology of skin cancer and HPV infection
- Cutaneous HPV - UV interactions
- Cutaneous HPV – host cell interactions
- Cutaneous HPV detection methods
- Future therapeutic options

Registration

- send me further information
- I intend to register
- I intend to submit an abstract
